

Bayan Alghourani

Junior Developer

Optimistic and eager to learn, I can take on various types of tasks and quickly adapt to new things. I have had several different professions and have a wealth of life experience that will help me on the path to become a better developer.

Skills

- Has expertise in JS/TS, C#, PHP, WPF, SQL programming languages.
- In addition, I have experience with development using Corepublish, Twig, React, SASS, Tailwind, Bootstrap as well as tools such as XML and HTMX.
- Furthermore, I have experience with Firebase, Trello, Github, Gitlab, Figma, Canva and several others.

Education

- W3schools (JS, PHP).
- Laracasts (PHP, Laravel).
- Front-End Programming and Coding at Podium AS.
- Full-stack at GET Academy.
- University Admission Certification, northern-Norway.
- Norwegian language program and social studies.
- Electronics studies at the High School of Damascus, Syria.

Previous Employment

- 3,2023 - 2,2024 CoreTrek AS: Placed at CoreTrek AS as a web developer with on-the-job training. I have gained valuable experience with the Corepublish framework and have actively participated in several projects. My areas of responsibility have included various support tasks in addition.
- 05,2022 - 08,2022 Seippel AS: Web developer creating a web-based solution.
- 2018 - 2019 Elektro-sport AS: Deployed through Lyngen Municipality's refugee service, participated in shop work and product deliveries.
- 2012 - 2015 Cassido (Istanbul, Turkey): Sales associate performing various jobs in Istanbul.

Projects

- Internal CRM: Enhance and extend existing functionality. Modified functionalities for searching, sorting, and integrations with 3rd parties (Visma and Moment). www.hageselskapet.no: Functionality to generate a member card as an image, from member info.
- www.nsm.no: Integration with Webcruiter Service to display vacancies.
- www.basto-fosen.no: Create new functions on the intranet and website to easily mark routes as out of service.
- www.atb.no: Fix problems with accessibility by following WCAG guidelines. Rewriting some forms.
- Solution to improve everyday tasks for cafes and restaurants with .Net WPF (<https://github.com/Bayans/RestaurantDemonstration/>).
