Hobbies

Coding: Passion for creating innovative solutions and testing new technologies.
Bodybuilding: Staying fit and healthy.
Fisking: Enjoying fishing adventures.

References

Available upon request.

As an optimistic and eager junior developer, I am passionate about creating efficient and user-friendly software solutions.
With a diverse background and a commitment to continuous improvement, I am dedicated to contributing positively to any development projects.

Projects

- Internal CRM: Enhanced, modified, and extended existing functionalities for searching, sorting, and integrations with 3rd parties (Visma and Moment).
  Impact: Improved efficiency in data management and client interactions.
- www.hageselskapet.no: Developed functionality to generate member cards as images using member information. Impact: Improved user experience.
- www.nsm.no: ntegration with Webcruiter Service to seamlessly display vacancies.
  Impact: Improved recruitment processes for users.
- www.basto-fosen.no: Created new functions on the intranet and website, including a feature to easily mark routes as out of service.
  Impact: Enhanced internal communication and route management.
- www.atb.no: Ensured accessibility compliance by following WCAG guidelines. Rewrote specific forms for better usability.
  Impact: Improved user accessibility and form submission rates.
- CafeProTech Solution (Personal Projects): Developed a .Net CORE solution to streamline everyday tasks for cafes and restaurants.

Education

- Online courses: W3schools (JS, PHP), Laracasts (PHP, Laravel).
- Front-End Programming and Coding at Podium AS, Larvik.
- Full-Stack Programming at GET Academy, Larvik.
- University Admission Certification Nordkjosbotn upper secondary school, Troms.
- Completed Norwegian Language and Culture Program in Lyngen, Troms.
- Electronics Studies at the High School of Damascus, Syria: Gained knowledge in electronics and circuitry,including basics of embedded processors programming.

Previous Employment

- CoreTrek AS (3/2023 - 2/2024): Web developer with on-the-job training. Actively contributed to projects that uses the Corepublish Framework, and handled various support tasks such as bug fixing, feature enhancements.
- Seippel AS (06/2022 - 08/2022): Created a web-based solution that considered later as the main website for the company. Improved the main company website by developing a web-based solution that showcases detailed descriptions of all the services offered by the company.
- Elektro-sport AS (2018 - 2019): Participated in shop work and product deliveries at Elektro-sport AS, where I had the opportunity to collaborate with the Lyngen Municipality's refugee service, gaining valuable insights into the Norwegian community and its people.
- Istanbul, Turkey (2012 - 2015): During my extended stay in Istanbul, I actively immersed myself in diverse roles, gaining valuable insights along the way. From bustling coffee shops and bustling restaurants to contributing in hotels and even serving as a teaching assistant, I wove together a rich tapestry of skills and experiences. My time in this vibrant city allowed me to engage with different cultures, languages, and work environments. It shaped me into a versatile and adaptable individual, ready to tackle new challenges in the world of developing. Whether debugging code or collaborating with cross-functional teams, I approach each task with enthusiasm and a commitment to continuous learn.
